

Since its establishment in 1997, Kostech has led the domestic Sign market based on differentiated technology and solutions, aiming to grow with customers.

Kostech which has established itself as a global solution supplier for the sign and textile industries by supplying more than 10,000+ units Large Format Printers (LFP) to Korea, continues to propose new solutions and introduce products suitable for the domestic market.

Kostech which has been supplying Large Format Printers (LFP) with various heads to the Korean market for more than 20 years, continues to discover competitiveness to contribute to customer business success by building state-of-the-art business support systems based on technology from years of industry experience.

In addition, Kostech has continued to invest in R&D to improve the quality of solutions provided to customers, and as a result, we were able to obtain various patent and trademark rights.

Founded to secure global competitiveness in the output sector, Orangebox provides optimal solutions for printers, ink and materials based on its own technology and strict quality control standards.

Orangebox has been awarded the 'Brand Award picked by customers' for the fifth consecutive year for its excellent quality, stability and competitive price and has been recognized as the most compatible ink for EPSON heads after long-term testing.

With Orangebox's water-based digital sublimation ink ST1000, which is opening a new horizon in the domestic sign market, stable quality can be implemented even during mass output and continuous output operations.

Customers always come first at the center of Kostech, a company that grows with customers and is always worried about their success.

Kostech will do its best to become a company that pursues continuous change and supports customers' business with new solutions.
